PERSONAL STATEMENT

My interest in technology and my desire to learn and grow led me to pursue a career in tech. My background in Accounting and Finance gives me a strong foundation in numbers and attention to detail, which I have been able to apply to my projects. I decided to attend Northcoders, a full stack development bootcamp to further my understanding. Throughout my time at Northcoders, I discovered my passion for the problem-solving aspect of coding as the as the creativity that come with finding different solutions to a problem. I have gained experience in a wide range of technologies.

I understand that the tech industry is constantly evolving, and I am eager to continue learning and expanding my skillset. I am a quick learner and thrive in a fast-paced, dynamic environment. I am excited to bring my unique combination of technical and analytical skills to a new role in the tech industry.

TECHNICAL SKILLS

- JavaScript
- Node.js
- Jest
- HTML5
- CSS3
- React
- PostgreSQL
- Firebase
- Git version control
- VS Code

EXPERIENCE

NORTHCODERS

Northcoders Bootcamp Student, 04/2022-07/2022

I studied full stack software development at the 12-week north coders bootcamp in Manchester. This bootcamp follows a practical, industry led curriculum. I studied several different programming languages and technologies. During the bootcamp we created several front end and back projects as well as a final project which integrates both.

BACK END PROJECT

Back-end for news app- This is the news API server built using PSQL, express and node.js. The API was created using the following:

- A model-view controller pattern to handle server requests.

- Test driven development using Jest and Supertest to test API functions.

- Error Handling: endpoints have custom error codes and messaging.

- Heroku for hosting the API.

- Data is stored in PostgreSQL

https://github.com/jomit1612/BC-NC-NEWS.git

FRONT-END PROJECTS

Front-end for news app- A responsive front-end news application which is connected to my backend news API server. This was my final full stack solo project built using React. Articles can be sorted by topic. Individual articles can be opened and read. Comments can be added under articles and they can be deleted. You can also like articles. https://github.com/jomit1612/nc-news.git

Calculator app - Fully functional calculator app created using react. https://github.com/jomit1612/calculator-app.git

Marketplace app- Marketplace app created using react, HTML and CSS querying endpoints on the database. Items can be sorted, added to basket, listed and deleted. Users can login and give likes. https://github.com/jomit1612/fe-nc-marketplace.git

FINAL PROJECT

Space Guardians game with social features- For my final project I worked in a team of 4 where we created game using phaser which also had a login feature, a chat feature and a live updating high score table. For the backend we used firebase for storage as well as authentication.. For the front end we used phaser, react, HTML and CSS. https://github.com/baurzhaan/spaceguardians

WORK HISTORY

Test and Trace Advisor, 06/2021 -02/2022
Sigmaflex-Manchester-Assisted individuals that had difficulty booking PCR tests by booking it for them over the phone. This role allowed me to really develop my communication skills as I was constantly engaging with different people that needed assistance.

Customer Service Assistant, 03/2018 -05/2021
Tesco – Manchester, Greater Manchester
Fielded diverse customer questions and resolved issues effectively and efficiently.
Resolved customer issues using strong interpersonal skills and conflict resolution techniques.

EDUCATION

UNDERGRADUATE DEGREE- MANCHESTER METROPOLITAN UNIVERSITY
Bachelor of Arts: Accounting and Finance, 06/2021

A-LEVELS - Connell Sixth Form College
Biology, 06/2018
Psychology, 06/2018
Chemistry, 06/2018
